

PATENT  
Atty. Dkt. No. 20973-20

IN THE CLAIMS

1. (Cancelled)
2. (Currently Amended) The portable wireless handheld device of claim 426, wherein the receiver is configured to receive audio signals relating to the event, and further comprising an audio component configured to provide event content for listening based upon at least one of the audio signals selected by a user.
3. (Cancelled)
4. (Currently Amended) The portable wireless handheld device of claim 226, wherein the video ~~and audio signals~~ content further comprises non-event related video content.
5. (Currently Amended) The portable wireless handheld device of claim 426, wherein the memory component is controlled by the user interface to configured for access to view the and replay stored event related video content on the display, thereby permitting the user to review again and again, as desired, the stored video content independent of new live video content received by the receiver.
6. (Currently Amended) The portable wireless handheld device of claim 426, wherein the memory component is a removable memory module configured to allow for downloading of the stored event content to an external device.
7. (Cancelled)
8. (Cancelled)
9. (Currently Amended) The portable wireless handheld device of claim 226, ~~further comprising a wherein the processor for controlling operation operates~~ in a plurality of modes, wherein the plurality of modes comprises ~~at least one of each of a video or television-viewer mode, radio, binocular-viewer, a digital camera mode and a camcorder mode.~~

PATENT  
Atty. Dkt. No. 20973-20

10. (Currently Amended) The portable wireless handheld device of claim 226, further comprising a housing having ~~awherein~~ the user interface has user inputs for selecting one ~~of~~between a plurality of the modes of operation, ~~wherein the plurality of modes comprises at least one of video or television~~ that comprise each of a video viewer mode, radio, binocular viewer, a digital camera mode and a camcorder mode.

11. (Currently Amended) The portable wireless handheld device of claim +26, further comprising an optics system having first and second lens assemblies provided as part of a housing to capture images of the event when directed toward the event.

12. (Currently Amended) The portable wireless handheld device of claim +26, further comprising an optics system having first and second lens assemblies provided as part of a housing to capture images of the event when directed toward the event, the optics system configured to provide a plurality of magnified modes of operation.

13. (Currently Amended) The portable wireless handheld device of claim +26, further comprising an optics system ~~having first and second lens assemblies provided as part of a housing to capture images of the event when directed toward the event~~, the ~~first and second lens assemblies~~optics system comprising a charge coupled device and ~~the optics system being~~ configured to provide a plurality of magnified modes of operation.

14. (Cancelled)

15. (Cancelled)

16. (Currently Amended) The portable wireless handheld device of claim 226, wherein the receiver is configured to receive the video and audio signals on a plurality of frequencies.

PATENT  
Atty. Dkt. No. 20973-20

17. (Currently Amended) The portable wireless handheld device of claim 226, wherein the receiver is configured to receive the video and audio signals using a plurality of transmission protocols.

18. (Cancelled)

19. (Currently Amended) The portable wireless handheld device of claim 226, wherein the receiver is configured to receive the video and audio signals only when authorized, the authorization based upon a unique code associated with a portable device.

20. (Currently Amended) The portable wireless handheld device of claim 226, wherein the display is configured for viewing by a user when engaged with the user's face.

21. (Cancelled)

22. (Currently Amended) The portable wireless handheld event entertainment device of claim 2431, wherein the processor is configured to provide conditional access to the event content based upon a unique access code.

23. (Currently Amended) The portable wireless handheld event entertainment device of claim 2431, further comprising a user input selectably operable by a user to control the images and sounds provided to the display and audio system.

24. (Currently Amended) The portable wireless handheld event entertainment device of claim 2431, wherein the optics system comprises a lens assembly configured to provide magnified modes of operation for viewing the event.

25. (Cancelled)

26. (New) A portable wireless handheld device to be used at an event by a user while watching the event live, the portable wireless handheld device comprising:

PATENT  
Atty. Dkt. No. 20973-20

a receiver to receive video content transmitted wirelessly to the receiver, the video content being generated by a plurality of cameras located at the event, the video content relating to the event;

a user interface having inputs to permit a user to select the video content from at least one of the plurality of cameras;

a processor selectably operated by a user to select video content from at least one of the plurality of cameras;

a display to display video content from at least one of the plurality of cameras selected by the user, wherein the receiver is configured to receive the video content while at the event and where the event is occurring, thereby permitting the user to carry the portable wireless handheld device about the event and choose where to view the video content selected by the user while roaming at the event during the event; and

a memory component to store at least a portion of the video content, wherein the portion of the video content to be stored in the memory component is selected and entered by the user through the user interface.

27. (New) The portable wireless handheld device of claim 26, wherein the user interface permits the user to selectively store single individual images, to be reviewed again and again on the display as desired by the user.

28. (New) The portable wireless handheld device of claim 26, further comprising an optics system that, when directed toward the event, provides binocular functionality, the display displaying video content from the receiver when in a video viewer mode and a magnified view of the event as detected by the optics system when in a binocular mode.

29. (New) The portable wireless handheld device of claim 26, further comprising an optics system that, when directed toward the event, provides binocular functionality, the display

PATENT  
Atty. Dkt. No. 20973-20

displaying a magnified view of the event as detected by the optics system when in a binocular mode, the user interface including inputs to select between different magnification levels at which the magnified view of the event is presented on the display.

30. (New) The portable wireless handheld device of claim 26, further comprising an optics system to detect user-controlled video content separate and independent from the video content produced by the plurality of cameras and received by the receiver.

31. (New) A portable wireless handheld device to be used at an event by a user while watching the event live, the portable wireless handheld device comprising:

a receiver to receive video content transmitted wirelessly to the receiver, the video content being generated by a plurality of cameras located at the event, the video content relating to the event;

an optics system that, when directed toward the event, provides binocular functionality to produce magnified video content separate and independent from the video content produced by the plurality of cameras and received by the receiver;

a user interface having inputs to permit a user to select the video content from at least one of the plurality of cameras and the magnified video content from the optics system;

a processor selectably operated by a user to select video content from at least one of the plurality of cameras; and

a display to display video content from at least one of the plurality of cameras selected by the user and to display the magnified video content from the optics system, wherein the receiver is configured to receive the video content while at the event and where the event is occurring, thereby permitting the user to carry the portable wireless handheld device about the event and choose where to view the video content selected by the user while roaming at the event during the event.

PATENT  
Atty. Dkt. No. 20973-20

32. (New) A portable wireless handheld device to be used at an event by a user while watching the event live, the portable wireless handheld device comprising:

a receiver to receive video content transmitted wirelessly to the receiver, the video content being generated by a plurality of cameras located at the event, the video content relating to the event;

a processor selectably operated by a user to select video content from at least one of the plurality of cameras;

a user interface having inputs to permit a user to select the video content from at least one of the plurality of cameras;

a display to display video content from at least one of the plurality of cameras selected by the user, wherein the receiver is configured to receive the video content while at the event and where the event is occurring, thereby permitting the user to carry the portable wireless handheld device about the event and choose where to view the video content selected by the user while roaming at the event during the event; and

the processor operating in a plurality of modes, wherein the plurality of modes comprises each of a video viewer mode, a binocular viewer mode, a digital camera mode and a camcorder mode.
